JELKA Software

WISH Wineshow Judging System

Provides an excellent interface to a powerful integrated database

Ease-of-use and active help to ensure productivity

Advanced reporting capabilities streamline the workload

BENEFITS

Built for the Wineshow committee, exhibitors, judges, and publisher.

Save time

- **Built-in support for web entries, as well as fast manual entry support**
- **Simple listing of varieties for each exhibit, used for automatic ordering of judging sequence in each class**
- **Automatic randomisation of exhibits in each class, with intelligent handling of subgroups such as variety mix, adjacent exhibitors, and other preferences**
- **Intelligent handling of Exhibit and Entry numbers**
- **Label printing for exhibits, including late entries**
- **All judging sheets with optional amount of details of vintage and varieties**
- **Fast entry of scores with immediate checking of awards**
- **Automatic assessment for all trophy candidates**
- **Automatic compilation of all details for commercial printing (classes, exhibits, judges, exhibitors, results, statistics)**
- **Automatic tax invoice preparation with mailing support, and payment tracking**

Reporting for all needs

- **Email support and mail out support for communication with exhibitors**
- **Multiple reports for all requirements, all able to be filtered with selected class, exhibitor, year of show**
- **Multiple statistical reports generated automatically, readily extendable**

Designed for the future

- **Built-in assistance for annual setup**
- **MS Access database, contemporary interface, designed for ease of use**
- **All data for all Wineshow years stored in single database, greatly simplifies setup and allows excellent reporting**
